

SUSANA MARTÍNEZ FORNÉS

UX LEAD PRODUCT DESIGNER

www.linkedin.com/in/susana-martinez-fornes

sus.martinezfornes@gmail.com | +31 638384490

PROFILE

Strategic, user-centred, Lead Product Designer with over seven years of experience working in cross-functional teams across multiple countries, driving product discovery and building solutions for internal product tools and B2B web applications.

Ability to solve complex business challenges by delivering intuitive, meaningful user experiences, combining a data-driven mindset with strong storytelling skills to lead discovery phases, mentor design teams, and deliver digital products aligned with business goals.

EXPERIENCE

LiveRamp (2019 – Present)

UX Designer → Product Designer → Senior Product Designer → Lead Product Designer

LiveRamp is a San Francisco-based SaaS company that provides solutions for only marketing workflows with a data connectivity platform that enables businesses to securely activate, share, and measure data across marketing and advertising ecosystems.

Lead Product Designer | June 2025 - Present Utrecht (Remote)

Cross-Media Intelligence App

Currently leading design discovery for a campaign measurement tool, analysing user behavioural data and coordinating user research and usability testing to improve the MVP by reducing time spent on creation flows and supporting AI implementation.

Agentic Segment Builder App

Contributing to the development of an Agentic Segment Builder that enables users to combine first-party, second-party and third-party data to create optimised segments for activation.

Collaborating closely with UX Research, Data Science, Engineering (FE-BE) and Product Management teams in the U.S.

Lens App

Supporting the design of an internal sales tool that enables sales executives to accelerate the initial stages of the sales cycle.

Senior Product Designer | October 2023 - June 2025 Utrecht (Remote)

Identity Engine, First Party Data Consolidation App

Simplified the look and feel and enhanced the user experience of complex workflows related to first-party data preparation, resolution and export.

Delivered an improved dashboard experience that enabled users to better manage and understand their first-party data, facilitating and reducing time on the identification and removal of unqualified IDs from the database for activation purposes.

Conducted contextual inquiry interviews to support MVP analysis, identifying key usability issues and user needs. Led walk thought and A/B testing of the final version to validate proposed solutions.

Collaborated with Data Science, Back-End teams in the UK, Product Management teams in the US and Front-End teams in India.

The Usage & Billing System

Led the resolution of multiple issues related to misalignment and inconsistencies across the usage reporting application, billing system and asset management used by clients to track and manage data usage in the system.

Conducted design discovery across multiple product verticals, run in-depth interviews, created service design mappings and service blueprints, in close collaboration with internal teams to identify issues and priorities.

Delivered an improved data visualisation dashboard and and billing management interface that enabled users to better understanding of the data ingestion cost aligned with the usage and management of their monthly billing.

Collaborated with Internal Billing, Go-to-Market teams in the US and Engineering teams in China.

LiveRamp Internal Personas

Conducted an internal discovery to identify workflows and common patterns in how employees use internal applications.

Applied UXR techniques, including surveys, in-depth interviews, role and workflow analysis, and service design with blueprint mappings. Created documentation of the findings and presented results to stakeholders and the entire product team.

Collaborated with UX Research team based in US.

Product Designer | March 2021 - October 2023 Amsterdam (Hybrid)

First version of Motif Design System

Created the initial version of the LiveRamp design system (Motif) to streamline product team workflows, ensuring visual consistency, scalability, and accelerated product development.

Collaborated with the Lead Designer on an extensive heuristic evaluation across four products, analysing and identifying issues and common patterns to create a consistent, logical, and cohesive design system, reducing time and costs for both design and engineering.

Admininstration Internal Platform (RBAC System)

Contributed to the development of the initial Internal Administration Platform in collaboration with Technical Services and Technical Operations teams, enabling faster client access to the platform.

Collaborated with the Lead Designer to analyse internal workflows involved in platform creation and access, streamlining processes to reduce both time and costs.

Worked closely with Implementation teams in the US and Engineering teams in China.

UX Designer | Faktor | May 2019 -January 2021 Amsterdam - On site

Faktor offered a Consent Management Solution (CMP) for publishers and particulars. Some functionalities and the look and feel of the application were managed by a self-service platform that allowed the clients to customise the CMP UI.

Faktor's Publisher Platform and CMP App integration

Contributed to UX improvements for Faktor's self-service platform, supporting a publisher-focused solution for managing and implementing a Consent Management Platform (CMP) for web and mobile in compliance with IAB, GDPR and CCPA standards.

Enhanced the user experience of the self-service platform, accelerating CMP management and string creation to simplify implementation on publisher websites.

Collaborated with Implementation teams in the Netherlands and Engineering teams in Serbia.

SKILLS

- Clear communication and storytelling.
- Leadership, strategy, mentorship
- Collaboration and team building
- Product Design, Service Design and Prototyping
- Research, Usability Testing and Analytics.
- Empathy, flexibility and adaptability.

METHODOLOGIES

- Service Blueprints Understanding the systems
- Competitive Research Analyzing competitors
- User Research Understanding the personas
- User Journeys Mapping the experience
- Design Iterations Double Diamond Process
- User testing & analysis Validating solutions
- C.R.A.P UI design principle

TOOLS

- Jira Epics / Design Discovery / Design Stories
- Miro Ideation / Journey Maps / Blueprints
- Figma Make Ideation / Concept Generation
- Figma Design / Prototype / Animations
- FullStory Insights / Analytics
- Tetra Insights User Research & Testing
- Notebook KLM Insights / Analytics
- Confluence PRDs / Documentation
